CONSERVATION OF THE HISTORIC ENVIRONMENT: THE LOCAL LIST

JUNE 2013
EXECUTIVE SUMMARY

The purpose of this paper is to provide a background to the proposed creation of a Local List and supporting policy contained within the Local Development Plan.

The paper introduces the concept, how it relates to national policy, future review and protection levels resulting from the designation and sets out the proposals for Newport.

1. INTRODUCTION

1.1 Newport contains over 450 buildings and structures which are of sufficient architectural and historic importance to be included on the statutory list by Cadw, the Welsh Government’s historic environment service. Listed Buildings enjoy statutory protection against unauthorised alteration and demolition. There are many other buildings and structures of architectural or historic interest which do not meet the strict criteria for statutory listing, but make a significant contribution to the character and appearance of Newport.

1.2 The Council recognises the valuable contribution that these buildings make, and has created a list of locally significant historic buildings and developed a supporting policy in the Local Development Plan which seek to protect them.
2. LEGISLATION AND POLICY CONTEXT

2.1 The compiling of a Local List of buildings and structures which make a significant contribution to local character and is supported and encouraged by national government guidance, Cadw and can be protected by the creation of supporting development plan policies.

Nationally

2.2 The Welsh Government endorses the production of lists by Local Planning Authorities of buildings which are of local importance in Welsh Office Circular 61/96:

‘Many buildings which are valued for their contribution to the local scene or for local historical association will not merit listing. Such buildings will often be protected by conservation area designation. It is also open to planning authorities to draw up lists of locally important buildings, and to formulate policies for their protection through development control procedures.’ Paragraph 48.

Locally:

2.3 Much of the historic environment is protected by some type of statutory function and national guidance. The LDP has focussed on developing a policy which reflects the local scale of heritage protection. Therefore the Newport Local Development Plan has developed a policy which relates directly to the protection of entries to the Local List.

2.4 The production of a Local List and a development plan policy is a clear response to the LDP Objective 5 Conservation and the Environment – To ensure that all development or use of land does not adversely affect, and seeks to preserve or enhance, the quality of the historic and built environment. The list seeks to protect that which has been recognised as being locally significant and worthy of some level of protection.

2.5 The inclusion of a building on the Local List does not affect the planning rights relating to the building, and permitted development rights remain unchanged. However, where an application is submitted to the Council for its alteration, extension or demolition, the special interest of the building will be taken into consideration and its Local Listing status will be a material consideration when determining the application. The List will be developed and provide a brief description of the entry and those aspects deemed to be of special interest in order to aid development management decision making.

2.6 The production of this list does not alter the fact that if a building is statutorily listed, listed building consent is required for demolition, any alteration and some repairs. If a building is in a conservation area, conservation area consent is required for demolition and most extensions require planning permission.
3. CRITERIA FOR THE SELECTION AND INCLUSION OF BUILDINGS WITHIN THE LOCAL LIST

3.1 Any building or structure of some significant historical or architectural interest can be added to the Local List, particularly if it can be shown that it contributes to the character of an area and is valued by local people.

3.2 The following are the criteria for including buildings on the Local List: -

a. **Authenticity** - Buildings or structures should be substantially unaltered and should retain the majority of their original features.

b. **Architectural Significance** - Buildings or structures that are of local architectural value and include design qualities typical of the local area.

c. **Historic Significance** - Surviving examples of buildings/structures illustrating local architectural history or design and also buildings associated with:
   - local historic events
   - strong community or socio-economic development significance (e.g. schools)
   - people
   - locally or nationally important architects, engineers or designers

d. **Townscape Significance** - Individual buildings or groups of buildings which contribute positively to the local area - for example, key landmark buildings, notable buildings on important routes into the area, which create a vista or contribute to the skyline.

3.3 The proposed list included in Appendix 2 gives basic details on buildings or structures considered to have the potential to be an entry. They are considered to have met some of the criteria as set out above. A review of these entries and the collation of detailed information will be set out in a formally adopted list.
4. THE SURVEY

4.1 The identification of buildings and structures in the local list has been taken from a Newport Borough Council document entitled ‘Listed Buildings in Newport’ outlining the listed and locally listed buildings within Newport as of 1995 (See Appendix 1 for details). This list has been reviewed and those buildings or structures deemed worthy of entry to the proposed list have been noted. During the review it was proposed that those entries currently on the statutory list of Listed Buildings within Newport have not been added to the Local List. If they have been delisted from the statutory list then they have been added to proposed Local List.

4.2 The Local List contains 144 entries spanning a wide range of buildings and structures including houses, shops, barns, offices, industrial buildings, chapels, gates, walls, road signs, WWII pillboxes, graves and stiles. Full details of the list are outlined in Appendix 2.

4.3 Though predominantly historic/vernacular in nature, the Local List nevertheless contains some examples of contemporary architecture of high quality.

5. NOTIFICATION

5.1 Once the list has been formally approved the owners of individual properties and structure, where known, will be notified in writing that their building or structure has been included on the Local List.

5.2 All Local List buildings and structures have been added to the Council's Historic Environment Record database (which in the near future will be available on the Council's website) and will be made available on the Geographical Information Systems (GIS) map layers used for Development Management purposes.

6. ADDING TO THE LOCAL LIST

6.1 The Local List is a dynamic document and individuals will be encouraged to propose additions which would meet the adopted criteria. Further nominations will be carefully considered against the Council’s adoption criteria as set out above. The relevant consultation and notification processes will be adhered to.
7. PROPOSED LDP POLICIES

7.1 The proposed Local Development Plan policy and supporting text for the protection of Locally Listed Buildings and Sites is set out below:

CE6  Locally Listed Buildings and Sites

BUILDINGS AND SITES OF LOCAL SIGNIFICANCE FOR THEIR ARCHITECTURAL OR HISTORIC INTEREST WILL BE INCLUDED ON A LOCAL LIST AND SHOULD BE PROTECTED FROM DEMOLITION OR INAPPROPRIATE DEVELOPMENT.

4.1 Listed Buildings are part of a recognised statutory designation process undertaken by the Welsh Government to protect nationally significant assets. There are, however, many other buildings and sites which may not feature on a national list, often because there are other protected examples elsewhere, but which are locally significant. The Council will prepare, and keep under review, a list of such locally significant buildings and sites, and will provide guidance on their protection and conservation. The criterion proposed to designate such an asset is outlined in the Local List background paper.

4.2 Development which is proposed to have an impact upon such a recognised site will require its status to be an added dimension in the overall consideration of a planning application, with emphasis given to the need for justification for the loss or unsatisfactory alteration of such buildings, and to intervention in development proposals to secure their conservation and enhancement.

Appendix 1 - Listed Buildings in the Borough of Newport 1995
Introduction

This brochure sets out to explain the importance of Newport's buildings of architectural and historic interest and the ways in which such buildings can be preserved. There has been concern for the retention and restoration of the best parts of our architectural and historic heritage for many decades and this interest has been strengthened by Central Government legislation concerning the need for the preservation of buildings of interest. Both Central and Local Government now have the powers to ensure that certain buildings are protected.

Grading of Buildings

The Welsh Office classify buildings of architectural and historic interest into three Groups, Grade I, Grade II* and Grade II, and these buildings are then included in what is known as the 'Statutory List'. In addition to this classification of buildings there is a further group known as the 'Local List', which includes buildings that do not qualify for the statutory list but nevertheless are worthy of preservation.

Listed Building Consent

All buildings included in the statutory list i.e. Grade I, Grade II* and Grade II are protected by law and should not be demolished, altered or extended in any way which will affect the character of the building without first obtaining 'Listed Building Consent' from Newport Borough Council. Listed Building Consent is not required for works for the demolition, alteration or extension of a Listed Church which is used for ecclesiastical purposes.
Application for Listed building Consent should be made to Newport Borough Council and are determined free of charge. Should consent be refused you have a right to appeal against that decision. The purpose behind the need for Listed Building Consent is of course not to preclude the owners of Listed Buildings from improving their properties but to ensure that any proposed changes are in character with the building and that any new building materials used are compatible with the existing fabric of the building.

**Enforcement**

When an owner demolishes or alters a Listed Building without Listed Building Consent the Local Planning Authority is empowered to served a Listed Building Enforcement Notice specifying the contravention and the works needed to remedy it. Failure to comply is subject to fines and a daily penalty. There is a right of appeal.

**Newport's Listed Buildings**

A complete record of Newport's statutory Listed Buildings and locally Listed Buildings is given in Appendix 1. As can be seen from Appendix 1, the statutory list contains 3 Grade I buildings, 6 Grade II* buildings and a further 220 Grade II buildings. In addition to this there are 150 locally Listed Buildings in Newport. Further details of many of the statutory Listed Buildings are available for inspection at the Civic Centre, Development Department. You will notice from Appendix 1 that not all Grade II listings are necessarily buildings. They can include such structures as the electricity transformer, Park Square and the statue of Lord Tredegar in Bridge Street.

Newport's stock of Listed Buildings is not static but is constantly being added to as locally Listed Buildings are upgraded in status by the Welsh Office to be included in the statutory list or indeed previously unnoticed buildings of some merit are discovered and brought to the attention of the Welsh Office.

Generally all buildings built before 1700 which survive in anything like their original conditions are listed. Most buildings of 1700 - 1840 are listed,
though some selection is necessary. Between 1840-1914 only buildings of definite quality and character are listed, the selection being designed to include principal architects. Some selected buildings built between 1914 - 1939 are listed but again a high standard of quality is required.

If you own/occupy a locally Listed Building, please do not hesitate to contact the Development Department of Newport Borough Council for advice regarding any proposed alterations to your property.

**Emergency Control - Building Preservation Notices**

To protect buildings which are of special interest which are not listed from detrimental alteration or demolition, planning authorities have been given power to serve emergency 'Building Preservation Notices'. A building subject to one of these notices is protected by the same provisions as a building which has been listed. The notice is effective for a maximum of six months, unless within that period the Welsh Office includes the building in the statutory list or decides that it should not be listed.

Old Vicarage, Marshfield. Formerly a 'locally listed' building which was protected by a building Preservation Notice. Upgraded to Grade II in 1984.

Great Milton Llanwern 16th Century house previously missed in the survey of the Borough Listed as Grade II when "discovered" in 1981.
Advice on Alterations

Improvements and alterations to buildings are often undertaken in a way which depends upon personal taste which in itself is invariably influenced by current advertising trends. Unsuitable DIY materials could be chosen which will spoil original designs and lose character.

A number of basic principles apply to all alteration work which may affect the character of Listed Buildings.

External Walls

Wherever possible exterior walls should be maintained in their original form whether of brick, stone or stuccoed finish. Refacing with roughcast, cement render, Tyrolean render, cement based paints or any other treatment which is irreversible, should always be avoided.

Windows

Windows should always be of appropriate design and respect the existing openings. The distribution and size of windows is one of the most dominant features in the character of any building. Timber sash and casement windows should never be replaced with aluminium or UPVC units. By far the best way to preserve the character of a building is to repair wherever possible, replace in the same manner where beyond repair and always respect character by insisting upon replacement windows which match the original in every respect. The replacement of an original set of window with 'off the peg' windows can be disastrous in visual terms.
Doors

Original panelled entrance doors should not be removed or altered. When original doors cannot be repaired, copied or modified satisfactorily, it is best that a replacement door should be of simple unaffected design. Manufacturers standard doors intended for modern houses containing ornamental glazing are seldom in character with older properties.

Roofs

The roof is always a dominant feature of any building and retention of the original shape, pitch and materials is most important. Slate, tiled or stone roofs should be retained in their original form and where repair is necessary, the practice of salvaging materials for re-use is to be encouraged. In some cases, sympathetic artificial materials can be acceptable replacements.

Chimneys

The character of a building invariably suffers if chimneys are removed or part-removed. Chimney stacks should be rebuilt in original materials wherever possible and chimney pots replaced.
Financial Assistance

It is generally the case that the costs of maintaining a Listed Building, particularly if it is of any size, exceed those of an equivalent modern building. A number of sources of finance are available to assist owners with repair and maintenance costs. These are:

1 Newport Borough Council
Discretionary grants are available for buildings of architectural or historic interest under the provisions of the Local Authorities (Historic Buildings) Act 1962. Buildings need not be included in the statutory list but the amount of finance reserved each year for these grants is extremely limited.

2 The Welsh Office
Grants for "outstanding buildings" normally Grade I, Grade II*, or occasionally Grade II are available from the Welsh Office under the provision of the Historic Buildings and Ancient Monument Act 1953. These are also discretionary grants.

3 The Welsh Office
For repairs or enhancement schemes in Conservation Area, Grants are available under the Town and Country Planning (Amendment) Act 1972.

What You Can Do

a) If you own or occupy a Listed Building in Newport (see Appendix 1) and intend to undertake any changes to the building please contact Newport Borough Council, Development Department, for advice as to whether Listed Building Consent is required.

b) As mentioned earlier, the survey of an area can often miss important buildings which are worthy of listing. If you know of any buildings in the Borough which might fall into this category but are not listed in Appendix 1, please contact Myron Wain, Development Department (01633) 232519.

The Borough Council has discretionary powers to make grants for the repair and improvement of pre-1919 houses. Details are available from the Housing Department.
