

GUIDANCE ON BUILDING REGULATION CHARGES WITH EFFECT FROM 1 JUNE 2014

NEW DWELLINGS

The charges for Building Regulation work are intended to cover the cost of the Service. There are two methods that the authority may use to establish the charge for building work:-

- Individually determined charges, and
- The establishment of a standard charge.

Individual determination of a charge

Charges are individually determined for the large and/or more complex schemes
This includes:

- Work consisting of the erection or conversion of 21 or more dwelling or
- Work consisting of the erection or conversion of dwelling where the floor area of a dwelling exceeds 300m²

If your building work is not listed as a standard charge, it will be calculated individually. Email building.control@newport.gov.uk with 'request for Building Regulation charge' in the title and provide a description of the intended work. We will contact you within 24 hours (Monday-Friday) to make a payment, for advice or more details telephone 01633 210093/95

STANDARD CHARGES

The following Table details the standard charges for new dwellings or conversions for form dwellings:-

Theses charges have been set by the authority on the basis that the building work does not consist of, or include, innovative or high risk construction techniques (details available from the Authority) and/or the duration of the building work from commencement to completion does not exceed 12 months.

These charges have been set on the basis that the design and building work is undertaken by a person or company that is competent to carry out the relevant design and building work referred to in the standard charges table. If they are not, the work may incur supplementary charges.

The charges shown will only apply when the electrical work is carried out using a Part P Registered Electrician. A Part P Registered Electrician is a qualified Electrician who also has the necessary building regulations knowledge to enable his accreditation body to certify his work. In order to recover the Local Authority costs if anyone other than a Part P Registered Electrician undertakes the electrical work an additional charge (please see Domestic Extensions and Alterations Charges – Table C, Category 5) is payable.

A Regularisation Charge (Retrospective application) – is to cover the cost of assessing your Application for Regularisation Certificate including all the inspections necessary and is payable upon submission of the Application. The Regularisation charge payable is the amount equal to **150%** of the **net** Plan/Inspection & Building Notice charge (No VAT).
